ADVANCED PROGRAMS, INC. Introduces the TEMPEST Level I Notebook for the Military/Intelligence Agencies.

COLUMBIA, MD (AUGUST 16, 2007) – ADVANCED PROGRAMS, Inc., a global leader in the design, manufacture and supply of TEMPEST equipment announces the new DWT-302 TEMPEST Level I Notebook.

The DWT-302 is the fourth generation TEMPEST notebook custom designed by API. This notebook is based on the industry leading Panasonic Toughbook CF-51.

"The new API TEMPEST notebook product will provide our customers features that better support their needs through our superior Tempest product design combined with Panasonic Toughbook technology," said Brian Shayuth, Director, Product Management. "This will enable API to penetrate new areas of the TEMPEST market and strengthen our presence in others."

DWT-302 Notebook
API's DWT-302 notebook is designed for use on the go. It includes many of the comforts of a desktop PC including: floppy disk drive, workstation quality video and a comfortable keyboard with generous sized keys. It has a 15" display which is great for group presentations because it can be seen with equal ease from
almost any angle and features video performance that more than equals that of the average desktop workstation. Plus, it is engineered to meet the graphically intensive needs of government agencies requiring a notebook computer with performance, rock-solid reliability and security compliance.

The DWT-302 utilizes Intel's new Centrino Duo Mobile technology for maximum performance with minimum battery drain and is available with an Intel® Core™ Duo Processor T2500, 2MB L2 cache, 2.0GHz Processor Speed and 667MHz FSB. This machine comes standard with 512MB SDRAM (with optional expandability to 4GB), a 80GB shock-mounted Hard Disk drive and a 15" 1600 x 1200 (XGA) TFT Active Matrix Color LCD. Two execution cores enable multiple applications to run simultaneously. Power is transferred only to those areas of the processor that need it.

ABOUT ADVANCED PROGRAMS, INC.: Advanced Programs, Inc. (www.advprograms.com) provides secure computing and networking equipment to the Military/Intelligence Communities of the United States and its allies. The core business involves participation on program teams requiring the design, manufacture, and supply of TEMPEST equipment and services. Advanced Programs, Inc. has been NSA certified for TEMPEST testing and manufacturing for over 20 years. API also provides: mission critical product development, quick reaction capability (QRC), custom packaging for site deployment, systems integration and production services. The company is headquartered in Columbia, MD. API Europe Ltd (www.api-europe.com) is a wholly owned subsidiary of Advanced Programs Inc. and is located in Chippenham, Wiltshire, UK. It was established to develop additional products and to provide support to API's Reseller Network throughout NATO Europe. Both facilities are ISO 9001 certified.
